NEW PRODUCT RELEASE:

Go-Shift Trans Controller
Ford AODE – PN 20011
Ford 4R70W – PN 20012

The Go-Shift stand-alone electronic transmission control is the perfect solution when it comes to managing a Ford electronic 4-speed transmission. Like our EFI systems, the Go-Shift is easy to install, affordable and simple to program.

In fact, all of the transmission settings, including shift points, firmness and converter lock-up can be adjusted through the supplied handheld monitor! A harness, complete with OEM style sealed connectors, makes installation a plug 'n play affair while the compact ECU easily mounts out of the way.

After setting up the trans, you can disconnect the monitor or keep it plugged in to view transmission data.

- Easily control and adjust the rpm points and firmness of each shift
- Direct plug-in harness for ease of installation
- Speedometer calibration and output
- Compatible with paddle shifts inputs
- Control the torque converter lock-up clutch
