## **NEW PRODUCT RELEASE:**

***3x2 Finned Air Cleaner Kit***  
***Cast Finish – PN 42400***  
***Polished – PN 42401***

FiTech's 3x2 Throttle body system is a great way to fuel your muscle car or hot rod truck and now you can finish the system with a trio of classic air cleaners!

These all-new D-shaped air cleaners deliver great looks with a high quality cast aluminum finned top and sturdy base designed specifically for FiTech's 2-barrel throttle body. The assembly measures 7.125" x 4.75" and only 4" tall for added hood clearance.

To ensure that only clean air enters the throttle body, the filters are made of an oiled, cotton/gauze element. These filters can be washed and reused for years to come thanks to a sturdy stainless mesh assembly. This design is proven to capture contaminants while allowing plenty of clean air to flow into the intake and mix with the finely atomized fuel from the injectors.

- USA-made cast aluminum tops and bases
- Efficient cotton/gauze filter element
- Wash and reuse the filters for years to come
- Supplied with gaskets, studs and fasteners
- Available as-cast or show quality polished finishes
- Fit's FiTech's 3x2 EFI systems (PN 39610 and the new LS 3x2 PN 70080)
