# ABOUT US

FiTech Fuel Injection was founded to make modern EFI technology easy to use, affordable, and built for real-world performance. Since 2015, we've helped thousands of builders, racers, and weekend wrenchers bring new life to their classic vehicles with systems that are simple to install and reliable on the road. From throttle body EFI to complete LS solutions, fuel systems, and ignition components, every product is tested for performance and supported by our in-house tech team. We are proud to be part of the automotive community, with a presence at major events across the country and a growing network of installers who trust our products every day. Headquartered in Riverside, California, FiTech is committed to giving you the tools, support, and confidence to drive your project forward.

PRODUCT SUPPORT

SELF LEARNING

3-YEAR WARRANTY

### Why We're Different

- **EFI Made Simple:** User-friendly systems for DIYers and pros alike.
- **Performance-Driven:** Every product is dyno-tested and street proven.
- **Real Support:** No AI bots. No runaround. Just real people who pick up the phone.
- **Built for Builders:** Whether you're restoring a cruiser or building a 1000HP drag car, we're here for your journey.

# FREQUENTLY ASKED QUESTIONS

EVERYTHING YOU NEED TO KNOW BEFORE AND AFTER YOUR PURCHASE.

## INSTALLATION & SETUP

### Q: DO I NEED A RETURN FUEL LINE FOR YOUR EFI SYSTEMS?

**A:** Most FiTech EFI systems require a return-style fuel system. However, our Force Fuel and In-Tank Modules simplify this by converting a return system into a returnless configuration at the tank.

### Q: HOW DO I WIRE THE FITECH SYSTEM INTO MY VEHICLE?

**A:** All systems include a full wiring harness and detailed instructions. Power, ground, switched ignition, and fuel pump control wires are clearly marked. For advanced setups, timing control and fan relays are also available.

### Q: CAN I USE MY STOCK FUEL TANK?

**A:** You can use your original tank, but it must be converted for EFI use. FiTech recommends upgrading to an EFI-ready fuel tank or retrofitting your existing setup with a high-pressure in-tank pump and proper return line. We offer complete fuel delivery solutions that work with both carbureted and EFI conversions.

## PRODUCT COMPATIBILITY

### Q: HOW IS THE SYSTEM HORSEPOWER DETERMINED?

**A:** Our horsepower ratings are based on fuel injector size, fuel pump capacity, and overall system design. Each system is matched to support a specific horsepower range using industry-standard calculations and real-world testing. For example, injector flow rate (in lb/hr), fuel pressure, and BSFC (Brake Specific Fuel Consumption) are factored in to determine how much horsepower the system can support safely and efficiently. We also test systems on the dyno to confirm performance and drivability under real-world conditions. Currently, all catalog-listed horsepower ratings are based on gasoline. If running E85, the actual supported horsepower will be lower.

### Q: CAN I RUN YOUR EFI WITH A SUPERCHARGER OR TURBO?

**A:** Yes. Many of our systems are boost-capable right out of the box, including our Power Adder Throttle Body Systems, Ultimate LS kits, and more. Just ensure proper fuel delivery and sensor setup.

### Q: WHAT KIND OF FUEL CAN I USE?

**A:** FiTech EFI systems are compatible with gasoline and E10 pump fuel out of the box. Many systems can also support E85, but this requires larger injectors and an E85-compatible fuel system, including proper fuel lines, pump, and filter. Keep in mind that E85 requires more fuel volume than gasoline to produce the same power, so horsepower capability may be reduced if the fuel system is not upgraded accordingly.

# FREQUENTLY ASKED QUESTIONS CONT.

## TUNING & CALIBRATION

### Q: DOES THE SYSTEM REQUIRE TUNING OUT OF THE BOX?

A: FiTech systems are self-learning and only require basic setup inputs like engine size, cam type, and ignition style. Once running, the system automatically tunes itself as you drive. Advanced tuning options are available for users who want to fine-tune for specific goals like peak power or fuel economy.

### Q: CAN I MANUALLY ADJUST AIR/FUEL RATIOS OR TIMING?

A: Yes. Through the handheld or via a laptop, you can access advanced tuning parameters including A/F ratios, timing curves, nitrous control, boost control, and more.

## ORDERING, WARRANTY & RETURNS

### Q: WHAT IS YOUR WARRANTY POLICY?

A: All FiTech EFI systems come with a 3-year limited warranty covering the throttle body, ECU, and harness components. Proof of purchase from an authorized retailer is required.

### Q: WHERE CAN I BUY FITECH PRODUCTS?

A: Products can be purchased directly at [FiTechEFI.com](http://FiTechEFI.com) or through any authorized dealer

### Q: WHAT'S YOUR RETURN POLICY?

A: Consumers have 90 days from the date of purchase to return unopened or unused systems. Dealers have a separate RMA process. All returns require a Return Authorization Number.

## TECH SUPPORT

### Q: HOW DO I GET TECH SUPPORT?

A: You can reach our tech team by phone at **951-340-2624**, email at [techmail@fitechefi.com](mailto:techmail@fitechefi.com), or by messaging us through our official social media channels. Whether you need help during installation or troubleshooting down the road, our U.S.-based team is here to help. **No AI bots; real techs, real answers.**

### Q: DO YOU OFFER INSTALLER SUPPORT OR TRAINING?

A: Yes. We offer Installer Training Sessions at our facility and at select events. Certified installers receive exclusive resources, discounts, and direct access to advanced tech support.

# THROTTLE BODIES

FiTech's Throttle Body EFI systems offer the perfect blend of modern performance and classic simplicity. Designed to replace a traditional carburetor, these systems deliver reliable cold starts, improved drivability, and self-learning technology that tunes as you drive. With options to support a wide range of horsepower levels and applications, FiTech throttle bodies bring easy, affordable EFI to hot rods, muscle cars, trucks, and more—all backed by our expert tech support team.

- Self-learning ECU with no laptop required—handheld touchscreen included for easy setup and tuning
- Available with or without ignition timing control
- Compatible with multiple fuel types, including pump gas and E85. HP rating based on gasoline with a naturally aspirated engine.
- Built-in sensors: TPS, IAC, IAT, and MAP
- Compact design fits most 4150 and spread bore intake manifolds

# CLASSIC THROTTLE BODIES

FiTech's Classic EFI Systems deliver modern fuel injection performance while preserving the look of a traditional carburetor. Designed for street-driven classics, these systems are the ideal choice for builders who want clean, reliable drivability without sacrificing vintage style.

- Carburetor-style throttle body with built-in injectors and sensors
- Supports up to 650 HP
- Remote-mount ECU keeps wiring clean and engine bay uncluttered
- Self-learning ECU for plug-and-play installation and minimal tuning
- Retains a traditional carburetor appearance—perfect for restorations and show cars

# 2 BBL THROTTLE BODIES

FiTech's 2-Barrel EFI Systems are the ultimate upgrade for small displacement engines and classic builds originally equipped with a 2-barrel carburetor. These systems maintain the vintage look while delivering smoother starts, improved fuel economy, and modern drivability.

- Ideal for 4, 6, or 8 cylinder engines making up to 400 HP
- Bolts directly to common H-2300 and R2G-style manifolds (adapter TD-P#2086 required)
- Minimal wiring needed: just connect power, ignition, tach, and fuel pump
- Self-learning fuel curve—no laptop tuning required
- Compatible with return or returnless fuel systems
- Maintains a classic look while enhancing cold starts, throttle response, and fuel efficiency

# 2 x 4

## THROTTLE BODIES

FiTech's 2x4 EFI Systems combine aggressive looks with modern drivability, offering a true blend of old-school style and cutting-edge performance. Whether you're running a traditional dual-carb-style intake or a roots-blown setup, these systems are built to deliver big power with smooth operation.

- Available in Naturally Aspirated (up to 625 HP) or Power Adder (up to 1200 HP) versions
- Each throttle body features four high-flow injectors for balanced fueling
- Multi-bolt pattern base fits tunnel rams, cross rams, and most 2x4-style intakes
- Power Adder version is compatible with Blow-thru (Roots SC's 671/871, Turbos), Draw-thru (Centrifugal SC's, Turbos) and nitrous setups
- Advanced self-learning ECU tunes as you drive; Pro Tuning Software allows fine control of fuel and timing under boost or nitrous

## THROTTLE BODIES

FiTech's 3x2 EFI Systems are the ultimate upgrade for classic builds originally equipped with a three duce carb setup. These systems maintain the vintage look while delivering smoother starts, improved fuel economy, and modern drivability.

- Carburetor-style throttle bodies with built-in injectors and sensors
- Supports up to 600 HP
- Remote-mount ECU keeps wiring clean and engine bay uncluttered
- Self-learning ECU for plug-and-play installation and minimal tuning
- Retains a traditional carburetor appearance—perfect for restorations and show cars

# UNIVERSAL THROTTLE BODIES

# 4150 4BBL

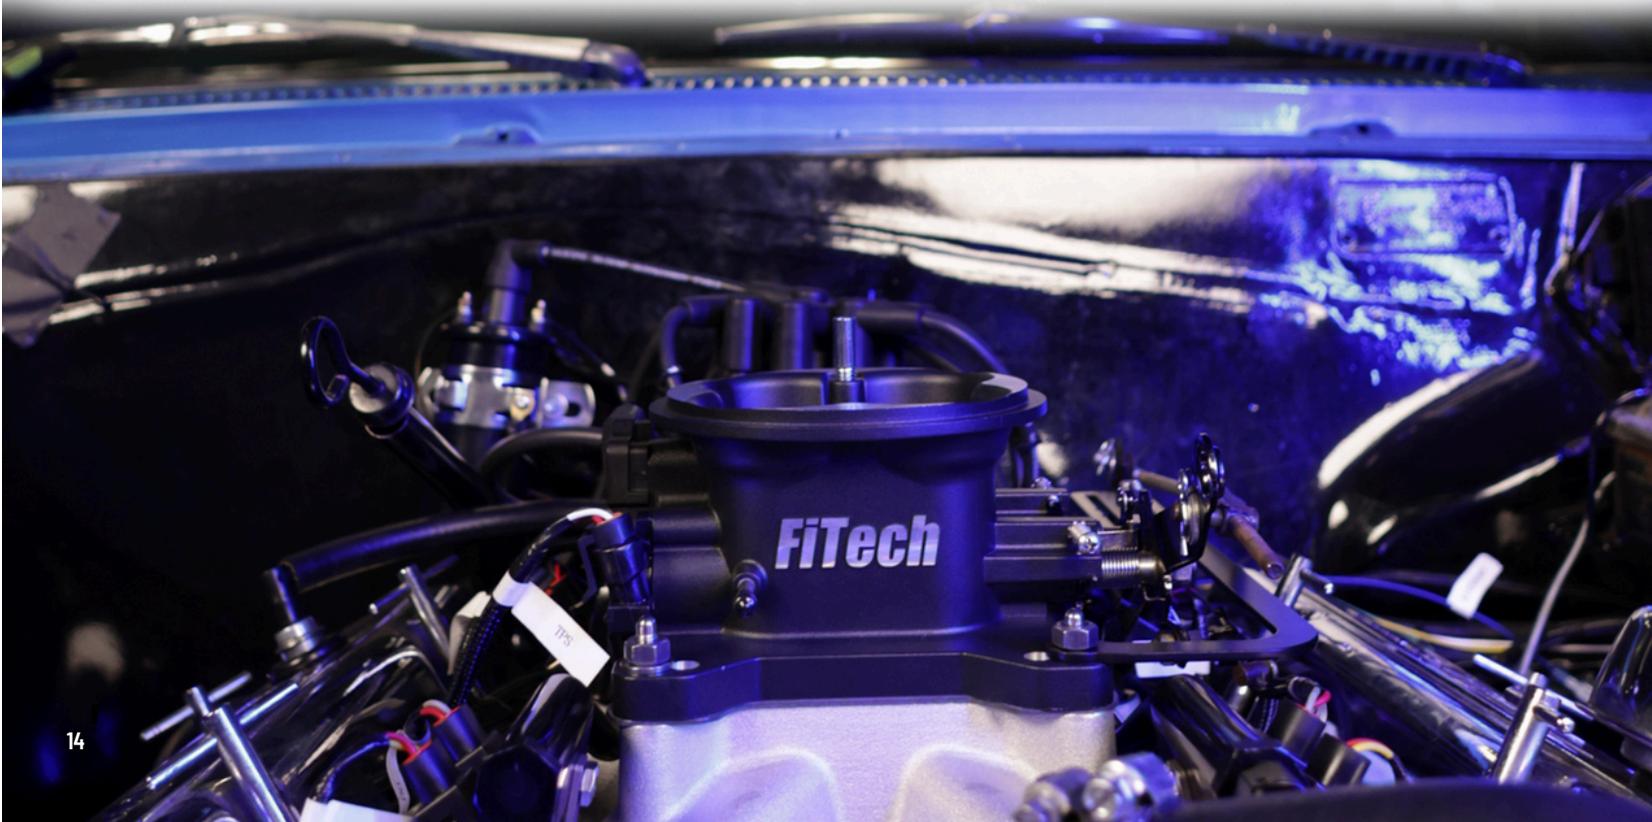

# THROTTLE BODIES

Designed for performance enthusiasts and engine builders alike, the FiTech Universal 4150 Throttle Body offers precision airflow and flexible sensor integration in a compact, high-flow package. Whether you're building a street car or a boosted race setup, this throttle body provides the control and compatibility to get the most out of your EFI system.

- 4150 universal flange fits most 4-barrel intake manifolds
- Delivers over 1000 CFM for serious airflow and horsepower potential
- Built-in Idle Air Control (IAC) motor for smooth, reliable idling
- Compatible with TMAP or MAP sensor setups (sensor-equipped models available)
- Threaded IAT sensor port ideal for boosted/blow-thru applications
- Non-progressive (1:1) throttle linkage for crisp throttle response
- Multiple vacuum ports for easy integration with accessories
- 'Timed' vacuum port for distributor vacuum timing reference
- Available in brilliant or matte black finishes to suit your build

# 4500 4BBL THROTTLE BODIES

Designed for custom EFI builds, FiTech's 4500 Universal Throttle Body delivers massive airflow and throttle control. Built for racers and high-horsepower enthusiasts, this throttle body bolts to any 4500-style intake and is ideal for boosted, nitrous, or naturally aspirated applications where custom EFI system is used.

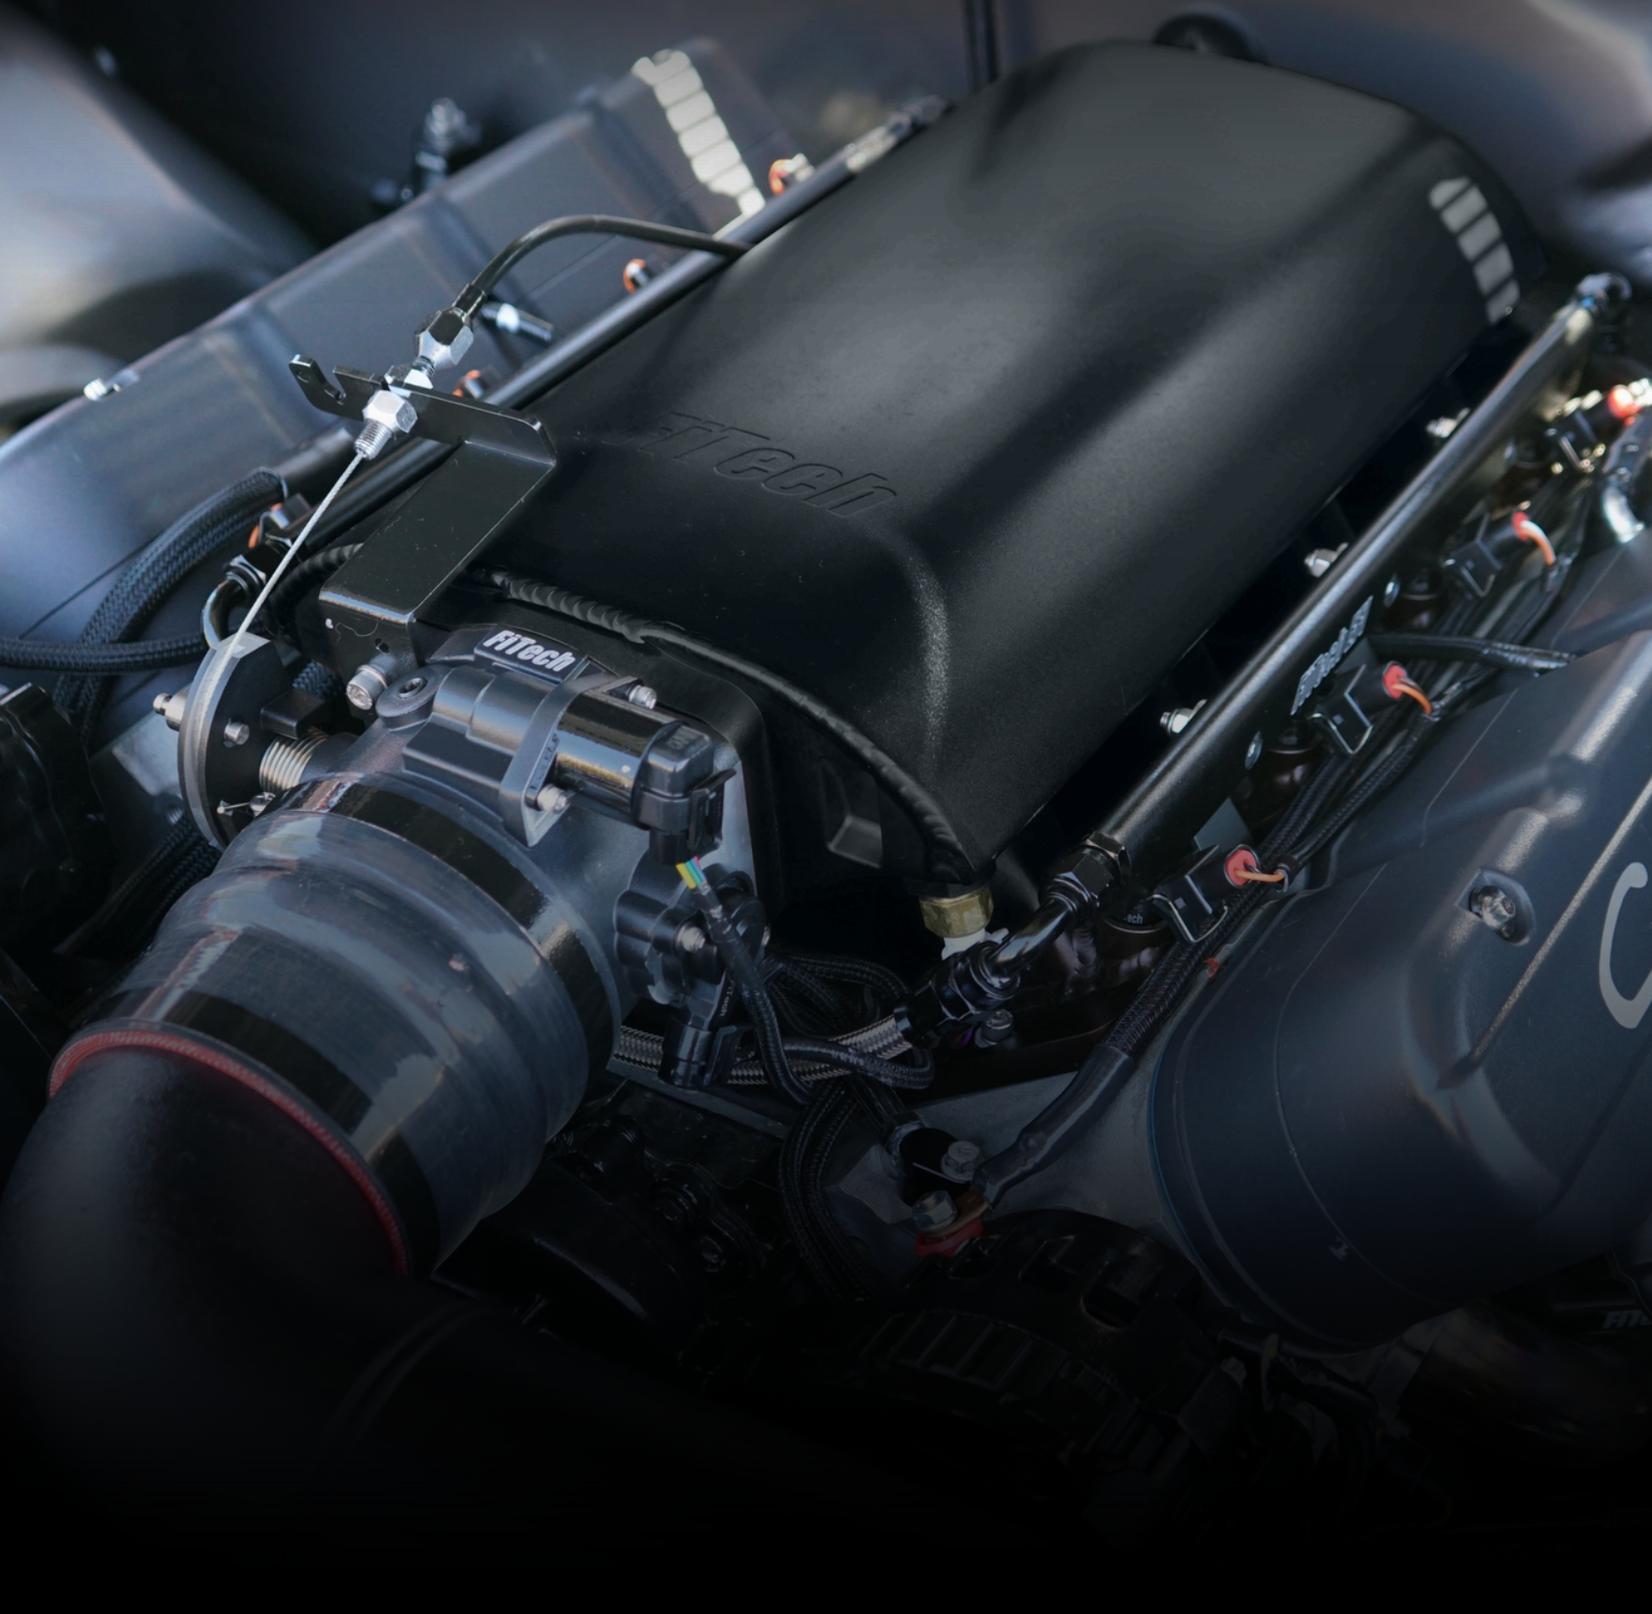

- 4500 bolt pattern for direct fit on race-style and high-rise manifolds
- Over 2400 CFM airflow to support serious horsepower builds
- Comes in TMAP or MAP sensor configurations
- Threaded IAT sensor port supports blow-thru and boosted applications
- Integrated Idle Air Control (IAC) motor for smooth idle control
- 1:1 throttle linkage for responsive and linear throttle input
- Multiple vacuum and boost reference ports for tuning and accessories
- Adjustable boost reference porting - i.e. vacuum ports for MAP/TMAP can be configured for external boost referenced for Draw-thru boosted applications

# LS ENGINE

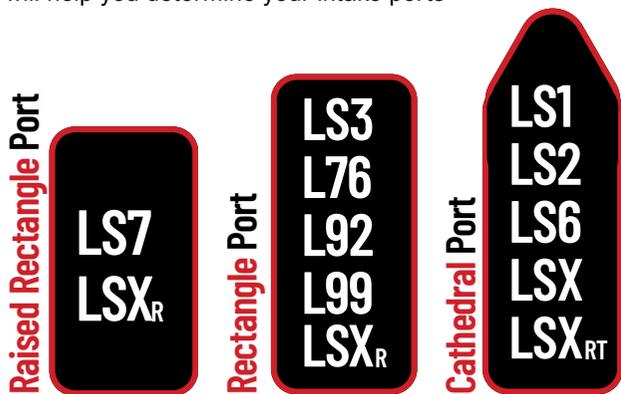

## EFI SYSTEMS

# HOW TO CHOOSE YOUR LS SYSTEM STEP-BY-STEP:

## 1 IDENTIFY YOUR LS PORT

FiTech offers LS EFI intake systems to cover most OEM applications including aftermarket heads. These drawings will help you determine your intake ports

## 3 DO YOU NEED TRANSMISSION CONTROL?

All FiTech LS EFI Systems are available in two versions:

### With Transmission Control

- For electronically controlled 4-speed automatic transmissions (4L60E, 4L80E, etc.)

### Without Transmission Control

- For manual transmissions or non-electronic automatics

### Not sure if you need transmission control?

If you're using a 4L60E, 4L65E, 4L70E, 4L80E, or 4L85E, choose with trans control. If you have a manual or other automatic, go without.

## 5 UPGRADE TO A MASTER KIT

Want a hassle-free install? Our **Master Kits** are the ultimate upgrade, pairing your EFI system with a complete fuel delivery solution and/or LS3 coil packs so you can hit the ground running.

### Why Choose a Master Kit?

- Includes your selected EFI system
- Adds a complete fuel delivery setup (Force Fuel, Inline, or in-tank pumps)
- Comes with fuel lines, filters, fittings, and more
- Engineered to work together—no extra trips, no guesswork

**Best Value:** Bundled pricing means you save time and money compared to piecing it together yourself.

**Recommended for first-time EFI installs, full conversions, or anyone starting fresh.**

## 2 DETERMINE YOUR HORSEPOWER

When selecting a FiTech LS EFI System, it's important to know your engine's horsepower. Our systems are offered in three configurations based on **maximum horsepower supported base on a naturally asperated engine running on Gasoline:**

System Option	Supports
500 HP System	Engines stock to 500 HP
750 HP System	Engines 500 to 750 HP
1000 HP System	Engines 700 to 1000 HP

**Note:** These systems can be used on engines with less than the listed horsepower. For example, a 500 HP system is perfectly suited for a 350 HP engine. Choose the system that covers your engine's power, **not one that exactly matches it.** Max horsepower numbers provided are based on naturally aspirated gasoline burning engines.

## 4 CHOOSE STYLE & FINISH

Customize your system to match your build's style under the hood.

### Intake Style Options:

- Short Intake (6.75"): low profile, fits most engine bays
- Tall Intake (8.75"): Aggressive look and added clearance to factory accessory drive components.

### Finish Options:

- Matte Black: Sleek, modern look with minimal glare
- Natural Aluminum: Classic, raw performance style

Need help choosing a system for your vehicle? Call our sales team for assistance:

CANADA (877) 521-7787

# ULTIMATE LS EFI KITS

FiTech's Ultimate LS Systems are complete, ready-to-run EFI solutions for LS engine swaps. Engineered for easy installation and reliable performance, each system includes a throttle body, injectors, harness, sensors, and an ECU—all designed to work together seamlessly. Whether you're swapping into a street car, cruiser, or hot rod, the Ultimate LS System brings proven EFI control and clean packaging to your LS-powered build.

- Complete EFI kit—includes ECU, harness, throttle body, fuel injectors, and sensors
- Supports a wide range of LS engines, from LS1 to LS7 and LQ-series
- Self-learning ECU with no laptop required; tuning via included handheld controller
- Available with or without trans control for 4L60/4L80 applications
- Compatible with drive-by-cable or drive-by-wire setups (depending on model)
- Multiple HP ratings available to match your build: 500 HP, 750 HP, or 1000 HP systems
- Includes wideband O2, MAP, CTS, IAT, TPS, and IAC sensors
- Supports return or returnless fuel systems
- Clean harness design with labeled connectors for easy installation
- 3-year limited warranty and backed by FiTech's expert tech support

MASTER KITS LOCATED ON PAGE: 69

# ULTIMATE REBEL LS

# EFI KITS

FiTech's Rebel LS Systems are complete, ready-to-run EFI solutions for LS engine swaps, delivering modern EFI control, clean packaging, and a sleek low-profile manifold that enhances both performance and engine bay appearance. Each kit includes everything needed to get your LS-powered street car, cruiser, or hot rod running with proven FiTech reliability.

- Complete EFI kit with ECU, harness, throttle body, injectors, and sensors
- Sleek low-profile manifold for a cleaner look and improved hood clearance
- Self-learning ECU tunes as you drive—no laptop required
- Offered with or without transmission control for 4L60/4L80 applications
- Compatible with drive-by-cable or drive-by-wire setups (depending on model)
- Available in 500 HP, 750 HP, and 1000 HP configurations
- Includes wideband O2, MAP, CTS, IAT, TPS, and IAC sensors
- Works with return or returnless fuel systems
- Clean harness design with labeled connectors for easy installation
- Backed by FiTech's 3-year limited warranty and expert tech support

MASTER KITS LOCATED ON PAGE: 80

# NITRO-PORT LS EFI KITS

FiTech's Nitro-Port LS EFI Systems combine modern EFI control with the all-new Nitro-Port cast intake manifold, designed for high-RPM power and clean installation. Available for LS1 and LS3 engines, these complete systems feature a sleek low-profile modular runner design, making them ideal for serious street builds and track applications.

- Complete EFI kit with ECU, harness, injectors, throttle body compatibility, and sensors
- Low-profile Nitro-Port cast intake manifold with modular short-runner design for high-RPM performance
- Available for LS1 and LS3 cylinder heads
- -8 AN fuel rails included, with pre-drilled nitrous/water injection port
- Supports 92mm, 102mm, and drive-by-wire throttle bodies
- Rear-mounted vacuum ports and MAP location for clean installation
- Offered in 500 HP, 750 HP, and 1000 HP configurations
- Available with or without transmission control for 4L60/4L80 applications
- Includes dual wideband O2, MAP, IAT, CTS, TPS, and IAC sensors
- Works with return or returnless fuel systems

# ULTRA PORT LS1 KITS

FiTech's Ultra Port LS Systems are engineered for serious LS performance, combining multi-port fuel injection with advanced ECU control and sleek packaging. Designed for builders who want clean looks, precise fueling, and support for high horsepower, these systems are ideal for street machines, race cars, and high-end swaps.

- Complete port-style EFI system includes ECU, harness, fuel rails, injectors, and sensors
- Supports engines up to 1000 HP, with multiple options to match your build
- High-quality fuel rails and injectors included for consistent delivery under pressure
- Available with or without transmission control for 4L60E/4L65E/4L70E/4L80/4L85E applications

# RETRO PORT LS1 KITS

FiTech's Retro Port LS Systems deliver modern port-style EFI performance with the timeless look of a carbureted intake. Designed for LS builders who want clean drivability without giving up a classic under-hood style, these systems are the perfect choice for muscle cars, hot rods, and vintage-style engine bays.

- Complete port-style EFI system includes ECU, harness, fuel rails, injectors, and sensors
- Supports engines up to 1000 HP, with multiple options to match your build
- High-quality fuel rails and injectors included for consistent delivery under pressure
- Available with or without transmission control for 4L60E/4L65E/4L70E/4L80/4L85E applications

# PORT INJECTION

## EFI SYSTEMS

# GO PORT BIG BLOCK CHEVY

FiTech's Go Port EFI Systems bring the benefits of port-style fuel injection to classic engine platforms like Small Block Chevy, Big Block Chevy, Ford, and Vortec. Designed as complete, easy-to-install kits, each system delivers modern drivability, improved throttle response, and better fuel control while maintaining the character of your classic engine.

- Complete port injection EFI system includes intake manifold, fuel rails, injectors, sensors, ECU, and wiring harness
- Supports engines up to 1050 HP, with multiple options to match your build
- Self-learning ECU eliminates the need for a laptop which tunes as you drive
- Includes wideband O2, MAP, IAT, CTS, TPS, and IAC sensors
- Supports return or returnless fuel systems
- Intake manifold designed for optimal airflow and injector placement

# GO PORT FORD SMALL BLOCKS

FiTech has partnered with the legendary Offenhauser brand to deliver Go Port EFI Systems that bring modern drivability to classic Ford small blocks, now available for both the 351 Windsor and 289/302 platforms. Each system is built around Offenhauser's iconic 360 Equa-Flow intake manifold, combining proven airflow and balanced fuel distribution with FiTech's self-learning EFI technology for precision fuel control, cold start reliability, and seamless performance. The 351W system provides an effortless way to update Windsor-powered vehicles without sacrificing simplicity or heritage, while the 289/302 system supports up to 500 horsepower with pre-installed injectors, fuel rails, and a clean harness layout—making it an ideal upgrade for enthusiasts who want reliability, drivability, and a traditional under-hood appearance.

# GO PORT VORTEC

FiTech offers a dedicated Go Port EFI System for GM's popular Vortec engine platform. This system is designed specifically to work with Vortec-style cylinder heads, delivering a clean bolt-on solution that combines the efficiency of port fuel injection with the simplicity FiTech is known for. The included Vortec-specific intake manifold ensures proper port alignment and optimized airflow for maximum performance.

- Complete port injection EFI system includes intake manifold, fuel rails, injectors, sensors, ECU, and wiring harness
- Supports engines up to 1050 HP, with multiple options to match your build
- Self-learning ECU eliminates the need for a laptop that tunes as you drive
- Includes wideband O2, MAP, IAT, CTS, TPS, and IAC sensors
- Supports return or returnless fuel systems
- Intake manifold designed for optimal airflow and injector placement

# STANDALONE PORT EFI

For builders running aftermarket ECUs or custom wiring setups, FiTech's Standalone EFI System offers the ultimate flexibility without the extra components you don't need. This system includes the throttle body, ECU and sensors; everything needed to install on an existing port injection intake with a 4150 flange. It's the perfect solution for those already equipped with a port injection system intake, injectors, and fuel rails but looking for a reliable, high-quality EFI system package.

Key Features:

- Self-learning ECU eliminates the need for a laptop which tunes as you drive
- Includes wideband O2, MAP, IAT, CTS, TPS, and IAC sensors
- Supports return or returnless fuel systems
- 4150 flange throttle body
- A great fit for high-performance street cars, hot rods, or restomods

# ULTRA PORT SMALL BLOCK

FiTech's Ultra Port EFI System for Small Block Chevy engines delivers precision fuel control, clean wiring, and a modern look all in one complete kit. Designed for builders who want high-performance port injection with a clean, professional finish, this system is ideal for both street and track builds.

## Key Features:

- Complete port injection EFI system for Small Block Chevy engines
- Includes intake manifold, fuel rails, injectors, sensors, wiring harness, and ECU
- Self-learning ECU with handheld touchscreen with no laptop required
- Supports up to 1000 HP, making it perfect for high-performance street or race engines
- Compatible with return or returnless fuel systems
- Includes essential sensors: MAP, IAT, CTS, TPS, IAC, and wideband O2
- Ideal for crate motors or custom SBC builds

## ULTRA PORT THROTTLE BODY OPTIONS

FiTech's Universal and Classic Throttle Bodies used on our Ultra Port systems both support the same horsepower levels and share the same 4150 flange, making them identical in performance and fitment. The only difference is aesthetic, the Universal Throttle Body

offers a sleek, modern billet-style look, while the Classic Throttle Body is styled to resemble a traditional carburetor for a more vintage appearance.

# ULTRA PORT BIG BLOCK

The FiTech Ultra Port EFI System for Big Block Chevy engines delivers serious port injection performance with an aggressive, race-inspired look. Featuring a single plane intake manifold, fuel rails, and injectors this system is designed to support up to 1000 horsepower. With a self-learning ECU and easy setup via the included touchscreen, the Ultra Port offers modern EFI control in a bold, high-performance package perfect for crate engines or custom builds.

# ULTRA PORT FORD

The FiTech Ultra Port EFI System brings modern fuel injection to classic Ford engines—including the 289, 302, and 351W, delivering serious performance with timeless appeal. Built around the proven Offenhauser intake manifold, these systems offer clean looks, reliable drivability, and high horsepower support, making them a smart upgrade for crate engines, restorations, and custom builds alike.

- Built on the legendary Offenhauser 360 Equa-Flow intake manifold for optimized airflow
- Supports engines making up to 1000 horsepower
- Pre-installed injectors and fuel rails simplify installation right out of the box
- Includes a self-learning ECU with no laptop tuning required
- Comes complete with all essential sensors and a handheld touchscreen for setup and monitoring
- Designed for use with both return and returnless fuel systems
- A perfect fit for high-performance street cars, hot rods, or restomods

# ULTRA PORT VORTEC

FiTech's Ultra Port EFI System for Small Block Chevy engines delivers precision fuel control, clean wiring, and a modern look all in one complete kit. Designed for builders who want high-performance port injection with a clean, professional finish, this system is ideal for both street and track builds.

## Key Features:

- Complete port injection EFI system for Small Block Chevy engines
- Includes intake manifold, fuel rails, injectors, sensors, wiring harness, and ECU
- Self-learning ECU with handheld touchscreen, no laptop required
- Supports up to 1000 HP, making it perfect for high-performance street or race engines
- Compatible with return or returnless fuel systems
- Includes essential sensors: MAP, IAT, CTS, TPS, IAC, and wideband O2
- Ideal for crate motors or custom SBC builds with Vortec heads

# CHEVY ULTRA RAM

## EFI SYSTEMS

# ULTRA RAM SMALL BLOCK CHEVY

Our Ultra Ram EFI Systems deliver outstanding port fuel injection performance with an aggressive looking sheet metal intake manifold. The design of the Ultra Ram intake performs as good as it looks and will support 650 HP for small blocks and up to 800 HP on big blocks.

The system comes ready to go out of the box with the injectors and fuel rails installed. The robust ECU is easy to mount and handles the air/fuel mixture targets with self-learning technology so no laptop is required. In fact, you only need to input a few engine specs into the color touch screen monitor to get the engine to run! The Ultra Ram is ideal for crate motors or your custom built engine and will deliver great performance with the looks to match.

- Pre-assembled system includes injectors and fuel rails installed out of the box
- Self-learning ECU with no laptop tuning required.
- Quick setup with just a few engine specs entered via the included color touchscreen controller
- Ideal for crate engines or custom-built setups needing high-performance port injection
- Compatible with return or returnless fuel systems
- Clean, modern appearance designed to stand out in any engine bay

# RETRO-FIT TPI

There are thousands of small-block Chevy engines that were fueled by their Tuned Port Injection (TPI) systems back the mid '80s to early '90s. These were popular engine swaps years ago, but the electronics and tuning left a lot to be desired. To help bring your GM TPI system up to date, we offer four Retro-Fit kits for these engines that provides improved calibration and tuning along with our proven self-learning EFI technology.

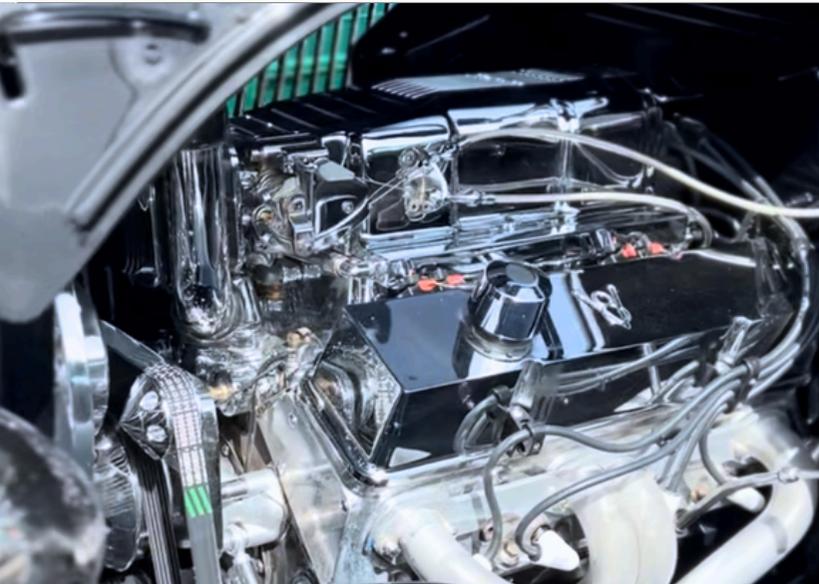

The robust ECU is easy to mount and connects through a complete wiring harnesses that is terminated with factory style connectors to ease installation. The harness plugs into the factory distributor, injectors and sensors. Then can easily be calibrated to your specifications through the color touchscreen handheld controller.

- Upgrade old GM TPI systems to modern technology
- Improved driveability and performance
- No laptop required with an easy to use touchscreen controller
- New wiring harness connects to factory sensors and components
- Removes MAF sensor for easy installation
- Proven self-learning technology and performance
- Lock-up control for 200-4R/700-R4 trans
- Upgraded kits available for use with 4L60E/4L65E/4L70E/4L80/4L85E transmissions

**Note:** Works with OEM CTS, IAC, TPS , Injectors, and Knock Sensors.

# FUEL DELIVERY

# GO FUEL

## FORCE FUEL SYSTEMS

PN: 50004

### FORCE FUEL SYSTEM

The FiTech Force Fuel System is the go-to solution for adding high-pressure fuel delivery to your EFI setup without overhauling the entire fuel system. Designed to mount under the hood, it works with your existing mechanical or electric low pressure fuel pump to fill a half-gallon reservoir, where an internal 340-LPH pump and regulator take over, delivering a consistent 58 PSI to your EFI system. Easy to install, reliable under pressure, and compatible with modern fuels, it's perfect for performance street cars, autocross builds, and off-road applications.

- Supports up to 800 HP (NA) EFI systems when using gasoline
- No more fuel slosh issues-ideal for autocross and off-road
- Effective 10-micron serviceable filter ensures the best filtration
- Fuel gauge included
- Increased fuel capacity over other systems
- No chance of cavitation, even under hard cornering or acceleration
- Capable of running with E85, ethanol, or methanol based fuels
- Supplied with -6 AN Inlet, -6 AN outlet, -6 AN Return fittings

The FiTech Dual Pump Force Fuel System simplifies the transition to EFI while delivering the high fuel flow needed for serious performance. Designed to work with a mechanical or electric fuel pump, it supplies a reservoir that feeds twin 340-LPH pumps, capable of supporting up to 1,600 HP naturally aspirated. Pumps have separate outputs and power lines so they can be staged if needed, or ran simultaneously, all based on your fuel requirement needs.

- Supports up to 1600 HP (NA) EFI systems when using gasoline
- Works with mechanical or electric fuel pumps
- Dual 340-LPH internal pumps for high-volume fuel delivery
- Dual internal regulators maintain consistent 58 PSI
- Hold approximately ½ gallon of fuel for pump submersion and cooling
- Compact under-hood mounting bracket for easy installation
- Perfect for EFI conversions without modifying the factory fuel tank
- Supplied with (1x) -6 AN Inlet (2x) -6 AN outlet, (1x) -6 AN Return fittings

PN: 50005

### DUAL FORCE FUEL SYSTEM

PN: 50006

### MINI FORCE FUEL SYSTEM

Built for tight engine bays and clean EFI conversions, the FiTech Mini Force Fuel System offers the same reliability as the original Force Fuel in a compact, easy-to-mount design. Ideal for street rods and vehicles with limited space, the Mini allows you to run your existing mechanical or electric fuel pump to feed a small reservoir, making EFI upgrades simple without reworking your entire fuel system.

- Compact, space-saving design perfect for street rods and tight engine compartments
- Works with low-pressure mechanical or electric fuel pumps
- Integrated 255-LPH internal pump delivers steady, high-volume fuel flow
- Built-in regulator maintains 58 PSI, ideal for EFI systems
- Half-gallon reservoir keeps the pump submerged and running cool
- Mounting bracket offers four-position adjustability for flexible installation
- A great solution for clean, under-hood EFI upgrades without modifying the fuel tank
- Supplied with -6 AN Inlet, -6 AN outlet, -6 AN Return fittings

**WARNING:** Cancer or Reproductive Harm

**Emission Controlled Vehicle Information:** Not legal for use on Emissions Controlled Vehicles. Check with your local DMV, emissions testing facility or applicable State laws before installing.

# GO FUEL IN-TANK RETROFIT KITS

Our universal Pump Module can be used on tanks with a depth of 6" to 15". The billet top assembly was designed with the supply and return ports in a parallel position to help route the fuel lines easily and evenly. The vent port is on the other side to ease routing the line near the fill tube. The two fuel ports are threaded to accept -6 AN O-ring boss fittings for a secure, leak-free connection. A 340 LPH pump is included along with gaskets, terminals and clamps.

Available as a bundle with a tank

## IN-TANK PUMP MODULES

\*Requires external fuel pressure regulator.

PART #	NAME	HORSEPOWER	FLOW RATE	RETURNLESS
50014	Go Fuel In-Tank Fuel Pump 600 HP Module	600 HP	255 LPH	NO
50015	Go Fuel In-Tank Fuel Pump 800 HP Module	800 HP	340 LPH	NO
50016	Go Fuel In-Tank Fuel Pump 1000 HP Module	1000 HP	440 LPH	NO

## REGULATED IN-TANK PUMP MODULES

These In-Tank Modules feature a built-in regulator that maintains the fuel pressure at the desired 58-psi saving you time and the work of plumbing a regulator in-line. Each assembly can be used in tanks with a depth of 6 1/2" - 15". The feed port accepts a -6AN O-ring boss for a secure, leak-free connection. A required vent outlet is also machined. Thick gaskets and two length fuel socks are supplied.

Available as a bundle with a tank

PART #	NAME	HORSEPOWER	FLOW RATE	RETURNLESS
50017	Go Fuel In-Tank Regulated Pump 255 LPH	600 HP	255 LPH	YES
50018	Go Fuel In-Tank Regulated Pump 340 LPH	800 HP	340 LPH	YES

# GO FUEL IN-TANK RETROFIT KITS

## FUEL CELL PUMP MODULES

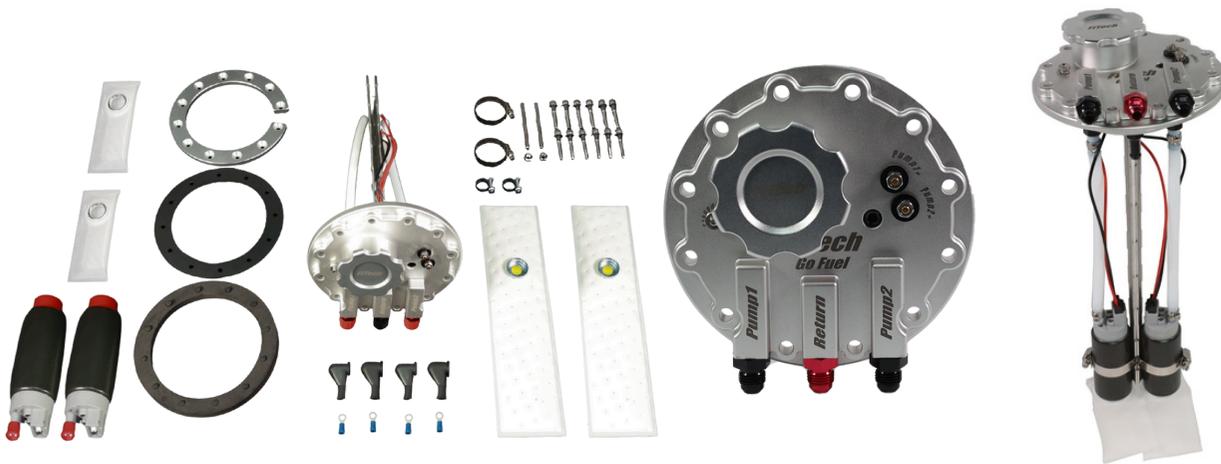

If you're running a fuel cell or custom tank, this Pump Module is the solution to your high pressure fuel needs. The billet top assembly is machined with a 2" filler assembly as well as an internal regulator to maintain 58-psi. This system is designed so no return line is needed! The Module is machined to fit fuel cells with a 12-bolt flange or can be installed on any tank with the supplied hardware. The single pump module supports up to 800 hp, while the dual pump module supports up to 1,600 hp.

5.375 inch diameter

# GO FUEL REGULATORS & FILTERS

## REGULATORS

The new Go Fuel Regulators allow you to set the fuel pressure precisely where your EFI system and engine require. Both models can be adjusted from 30 to 70 psi. Our Tight Fit regulators will support up to 1,000 horsepower while the High Horsepower model will support 2,000 HP. Crafted from billet aluminum, the regulators feature -6 ORB ports along with a vacuum/boost port and will accept a gauge. Two models are available; a compact 2-port unit as well as a larger, 4-port model. All models are return “bypass” style regulators.

PART #	NAME	PORTS	GAUGE INCLUDED	ADJUSTABLE FROM
54000	Go Fuel Tight Fit Regulator	2	NO	30-70 PSI
54001	Go Fuel Tight Fit Regulator With Pressure Gauge	2	YES	30-70 PSI
54002	Go Fuel Regulator With Pressure Gauge	4	YES	30-70 PSI

PN: 55012

PN: 55001

## RETURNLESS FILTER/ REGULATOR

This premium filter and regulator combination provides an effective and easy way to plumb your fuel system. The compact design features a built-in 5 micron filter for superior fuel cleanliness and includes -6AN connections for a feed line with filtered fuel, along with a return line connection. It regulates the fuel system at the required 58 psi with a maximum flow of 255 LPH—higher than typical OEM units, which are often limited to around 190 LPH.

## UNIVERSAL CHECK VALVE

This universal check valve will keep the fuel from leaking back into the fuel tank when your car is parked. This keeps the system primed and ready for quick starts and consistent performance.

## FUEL FILTERS

These new serviceable fuel filters are designed to go in a fuel delivery system whether its low or high pressure. The billet assembly has -8 ORB ports' and features a serviceable magnetic element that will trap debris from 100 microns to an even finer 10 microns to ensure nothing but clean fuel makes it to the injectors.

\*Fittings sold separately.

PART #	NAME	MICRONS	SERVICEABLE
55002	Go Fuel 10 Micron Fuel Filter	10 $\mu$	YES
55003	Go Fuel 100 Micron Fuel Filter	100 $\mu$	YES

# GO FUEL

## FUEL PUMPS AND MORE

### INLINE PUMP KIT

PN: 50001

This kit is supplied with our heavy duty 255 LPH external fuel pump that is suitable to support engines producing up to 600 (NA) horsepower. The kit includes 40 feet of high pressure fuel hose, two fuel filters including a serviceable 10-micron filter, fittings, mounts and clamps.

PART #	NAME	HOSE MATERIAL	HOSE FINISH	FIRE RETARDANT SLEEVE
50001	Go Fuel Inline Pump Fuel Delivery Kit	RUBBER	Black	NO
50002	Go Fuel Inline Pump Fuel Delivery Kit PTFE, Natural Finish	PTFE	Natural	NO
50003	Go Fuel Inline Pump Fuel Delivery Kit PTFE, Black Covering	PTFE	Natural w/ Black Covering	YES

PN: 50101

### INLINE FUEL PUMP

This fuel pump delivers performance and endurance. This is the same pump supplied with our 50001 Inline Fuel Pump Kit

PN: 80110

### FUEL PUMP MOUNTING KIT

This heavy duty billet fuel pump mounting bracket will fit both 52mm and 60mm diameter fuel pumps.

### FUEL PRESSURE GAUGES

These gauges will accurately display fuel pressure so you know exactly how your fuel system is pumping. Each gauge has an 1/8-NPT male filling on the back to thread to any 1/8-NPT port.

PART #	NAME	PSI	LIQUID FILLED
80117	Go Fuel 0-100 PSI Fuel Pressure Gauge Liquid Filled	100 PSI	NO
80118	Go Fuel 0-15 PSI Fuel Pressure Gauge Liquid Filled	15 PSI	NO

### BANJO FITTINGS

FiTech's Banjo Fittings provide a compact, low-profile solution for tight fuel line routing around throttle bodies and fuel rails. Designed for clean installations and leak-free performance, they are ideal for maximizing clearance in crowded engine bays.

PN: 62018 & 62019

# GO FUEL PTFE FUEL HOSE KITS

FiTech PTFE Fuel Line Kits are engineered to deliver maximum fuel system performance, safety, and durability for both street and high-performance builds. Compatible with pump gas, ethanol, methanol, or alcohol, these kits are a reliable upgrade for any EFI setup. Each kit features anti-static PTFE hose construction, corrosion resistance, and a choice of natural or black finish to suit your build's style. With premium fittings, advanced filtration, and added system safeguards, these kits are built to perform under pressure.

- Compatible with pump gas, ethanol, methanol, and alcohol
- Constructed from anti-static PTFE hose for added safety and static protection
- Available with an external natural or black finish to match your engine bay
- Black version includes a fire-retardant nylon braid for abrasion and heat resistance
- Includes (QTY 12) -6AN fittings for leak-free, secure installation
- Magnetic 10-micron stainless steel mesh fuel filter is serviceable and reusable
- Inline check valve maintains fuel pressure and prevents backflow
- Designed to withstand the demands of street or race environments
- Provides clean, consistent fuel flow and long-term corrosion resistance

**Black hose kit includes a tough external nylon braid that protects against abrasion and heat**

**Natural finish hose kit provides a stainless steel appearance that blends cleanly along the chassis or undercarriage.**

PART #	NAME	HOSE LENGTH	HOSE FINISH	FIRE RETARDANT SLEEVE

# GO-SPARK DISTRIBUTORS

FiTech's Go Spark Distributors are designed to bring dependable, high-performance ignition to a wide range of classic American engines. Now available for Chevy, Ford, Chrysler, Buick, Pontiac, Cadillac, and Oldsmobile applications, these distributors offer the strength, flexibility, and ease of installation builders expect—whether for a weekend cruiser or a serious street machine.

- Available for Chevy, Ford, Chrysler, Buick, Pontiac, Cadillac, and Oldsmobile engines
- Offered in both ready-to-run and 2-wire pickup options
- CNC machined aluminum housings for durability and heat resistance
- Adjustable mechanical advance for precise timing control across RPM ranges
- Ready-to-run versions include internal ignition module for simplified 3-wire hookup
- Works with carbureted or EFI systems
- Ideal for street rods, muscle cars, restorations, and performance builds
- Backed by FiTech's 3-year limited warranty

# GO-SPARK SPARK PLUG WIRES

FiTech's Go Spark Ceramic Spark Plug Wire Kits are built for high-performance engines where heat and reliability matter most. Designed for Chevy/GM applications, these premium wire sets combine ultra-low resistance with exceptional RFI/EMI suppression, delivering consistent spark and long-lasting durability—even in extreme conditions.

- Designed for Chevy/GM engines, with custom-fit and universal options
- Built from 8mm low-resistance Ferro-Spiral core for maximum spark energy and noise suppression
- Double silicone insulation rated to 600+ degrees Fahrenheit for high-temp reliability
- Ceramic spark plug boots withstand up to 2,000 degrees Fahrenheit—ideal for tight header clearance
- Includes 8 spark plug wires plus 2 extra unterminated wires for custom fitment
- Comes with crimp tool, wire separators, and numbered wire labels for easy installation
- Stainless steel terminals for strength and corrosion resistance

# GO-SPARK IGNITION COILS

## IGNITION COIL

The FiTech Go Spark Ignition Coil is designed to deliver consistent, high-energy spark for improved performance and reliability. Tuned to match the FiTech CDI and compatible with a wide range of applications, it features a universal mount for flexible installation anywhere in the engine bay.

PN: 90001

## READY-TO-RUN COIL

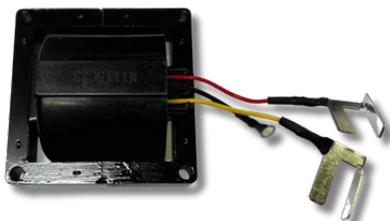

The FiTech Go Spark Ready-To-Run Coil is a high-output coil built for seamless compatibility with FiTech Ready-to-Run Distributors and Go Spark CD ignition systems. Engineered for durability and performance, it features high-temp epoxy encapsulation and brass contacts to ensure reliable spark delivery, even at high RPM.

PN: 99904

## HEI COIL

The FiTech Go Spark HEI Coil is designed for coil-in-cap distributors on 4, 6, and 8-cylinder engines, offering reliable, high-output performance. Compatible with FiTech Go Spark HEI distributors and most aftermarket 4-pin modules, it features optimized internals, high-temp epoxy construction, and includes an installation hardware kit for easy setup.

PN: 99903

## OIL FILLED ROUND COILS

FiTech's Go Spark Oil Filled Round Coils combine classic styling with modern ignition performance, making them ideal for vehicles running electronic breaker-less distributors. Available in chrome or black, these coils deliver high output and reliability while maintaining the vintage look of a traditional can-style coil.

PN: 99905

PN: 99906

## LS3 IGNITION COILS

The FiTech Go Spark LS Coils are designed to deliver strong, reliable ignition performance for LS3-style applications. These direct bolt-on coils feature OE-style connectors and terminals for a straightforward upgrade, with an optional version that includes a built-in LED indicator to show coil firing activity.

# GO-SPARK CDI MODULES

Boost your ignition performance with FiTech's Go Spark CDI, designed to deliver multiple sparks at low RPM and powerful, consistent spark at high RPM. Perfect for distributor-equipped engines, this system improves starting, idle quality, and throttle response for both street and race applications.

- Multiple spark discharge below 2,500 RPM for improved idle and throttle response
- High-energy single spark above 2,500 RPM for complete combustion at higher speeds
- Compatible with 4, 6, and 8-cylinder distributor-equipped engines
- Accepts trigger signals from HEI, amplifier, points, and 2-wire non-magnetic pickups
- Includes 12V square wave tach output for use with EFI systems and tachometers
- Ideal for performance upgrades on classic or custom builds

PN: 90001

GO-SPARK CDI BOX

PART #	NAME	SPARK ENERGY	PRIMARY VOLTAGE	SPARK DURATION	MULTI-SPARK UNDER	BATTERY SUPPLY	MAX RPM
91000	Go Spark CDI Box	150mJ	450	20°	2,500 rpm	6-18 Volts	10,000
91001	Go Spark Advance CDI	450/200mJ	450/500	20°	2,500 rpm	6-18 Volts	10,000

The FiTech Go Spark Advanced CDI is built for serious performance, combining street-friendly driveability with track-ready spark energy and built-in control features. The Go-Spark Advanced CDI allows two user selectable modes of energy output. A Low setting of ~275 Millijoules used for typical street use and a High setting of ~585 Millijoules for track/race mode.

- Switchable energy output
- Ideal for engines running boost or nitrous
- Features built-in burnout, staging, and over-rev limiters
- Includes starting retard and single-stage nitrous retard functions
- Simple push-button programming with LED display, no apps or devices required
- Designed for street and bracket race applications looking for control and performance

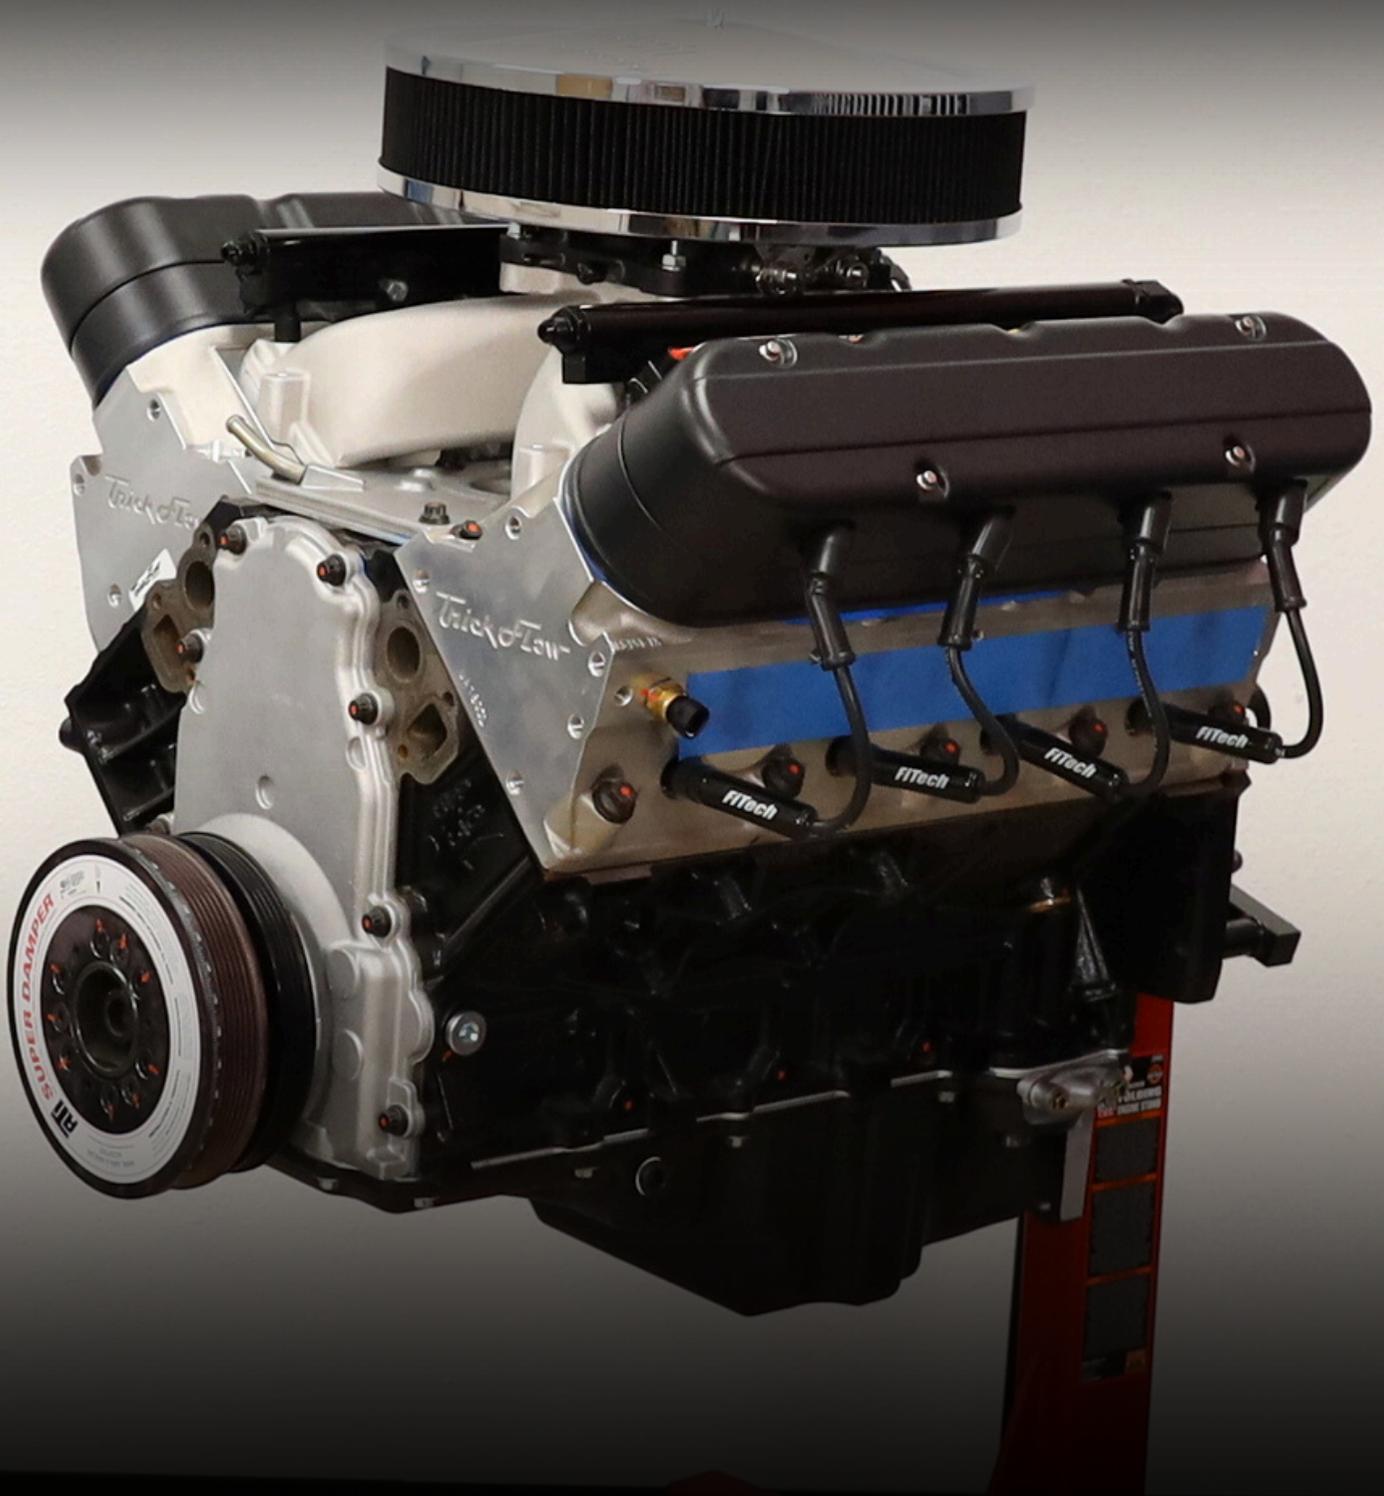

PN: 91001

GO-SPARK ADVANCED CDI

# FITECH PLUS

# FITECH PLUS OIL PANS

FiTech's LS Valve Covers combine style and function, offering a clean, custom look for LS-based engines without sacrificing compatibility. Available in polished, or black finishes, these covers are built to clear high-lift valvetrain setups and include everything needed for installation.

- Offered in Standard, Medium, and Ultra Low Profile configurations
- Designed to fit GM muscle cars, trucks, and swap platforms from 1955 to 1987
- Ultra Low Profile version provides clearance for tight chassis like Fox Body Mustangs
- Fits up to 4.00-inch crankshaft stroke in Ultra Low design
- Includes OEM-style oil filter mount, oil cooler port provision, and NVH suppression
- Comes complete with sump baffle, pickup tube, sump plug, oil filter stud, and passage cover
- Compatible with LS3 dipsticks and standard off-the-shelf oil filters
- Available in Satin, Black, and Polished finishes to match your build style

# FiTECH PLUS VALVE COVERS

FiTech LS Valve Covers combine style and function, offering a clean, custom look for LS-based engines without sacrificing compatibility. Available in Satin, Polished, or Black finishes, these covers are built to clear high-lift valvetrain setups and include everything needed for installation.

- Designed to fit LS-based engines with coil mounts included
- Offered in Satin, Polished, or Black painted finishes
- Tall design clears most valve trains with lift up to 0.700 inches
- Available in three styles:
  - Standard with angle-mounted coil bosses (LS3 72mm spacing)
  - With classic finned coil covers, supporting LS3 and LS1 coil bolt patterns
  - With smooth coil covers, also supporting both LS3 and LS1 coil bolt patterns
- Includes o-ringed oil filler cap, gaskets, and mounting hardware
- Coil covers feature a 2-piece design for easy access and styling flexibility
- Compatible with both Gen 5 LS3 (72mm) and Gen 1 LS1 (65mm) coil mounting spacings

# TOTAL PACKAGE EFI KITS

**One Part Number. Complete EFI Upgrade.**

FiTech's Total Package Systems make it easy to convert your classic to EFI with everything included in one kit. Each system features our Easy Street 600 HP throttle body EFI in a gold finish, a direct-fit fuel tank with internal pump, a complete braided fuel line kit, and all fittings and hardware needed for installation.

Designed for popular muscle cars including classic Chevy, Ford, and now more expanding platforms, these kits deliver smooth drivability, reliable fuel delivery, and modern performance—without the guesswork.

# RESOURCES & SUPPORT

At FiTech, we don't stop at the sale, we're with you every step of the way. We want to ensure your installation goes smoothly so you can get behind the wheel and enjoy FiTech performance with confidence.

What sets us apart is our commitment to real support. Over the years, we've found that answering the phone, keeping our tech lines staffed by real people, not AI chatbots, and being there when our customers need us most makes all the difference. Whether you're tackling your first install or fine-tuning a serious build, our team is ready to provide the guidance you need.

That's why FiTech has earned a reputation as the best in the business when it comes to support. Our customers know they can count on us for knowledgeable help, real answers, and unmatched dedication long after their purchase.

We've gathered a list of Frequently Asked Questions on our website that will likely have the answer to your question. Do I need to use timing control? Can I run a dual plane intake? What fuel pressure is required? All of these and many more are answered on our FAQ.

Our instructions provide thorough details to assist during the installation process. If you need a fresh set of instructions you can easily download them from our website.

We also provide a lot of links to media installations, tips, and product information from website magazines, social media posts and cool news.

# RESOURCES & SUPPORT

Along with our hands-on support, we've built an online hub of resources designed to make your FiTech experience even smoother. By scanning the QR codes throughout this catalog, you'll be taken directly to key sections of our website, from detailed tech videos and installation guides to our full Support Center.

These resources put the information you need right at your fingertips, backed by the same FiTech team that answers the phones and stands behind every product we sell. Whether you prefer step-by-step video instruction or one-on-one guidance, we make sure you have the tools to succeed.

The Tech Center page of our website (FiTechEFI.com) is loaded with quick, thorough tech videos that will answer many of the most common questions regarding installation, calibration, and tuning. Be sure to take a look!

Have questions and want to speak to a real life person? We have techs ready to help you over the phone or through email. Please contact us at 951-340-2624 or email techmail@fitechefi.com. Our team will get back to you ASAP!

Looking for a dealer or installer in your area to help with your FiTech recommendation or installation? Our website can direct you towards assistance with a quick effective zip code search.

# FITECH WARRANTY COMMITMENT

## PERFORMANCE BACKED BY CONFIDENCE.

Every FiTech EFI system is backed by our industry-leading 3-Year Limited Warranty. This coverage reflects our commitment to quality, durability, and customer confidence. If a defect in materials or workmanship arises during normal use within three years of the original purchase date, FiTech will repair or replace the product at our discretion.

Our warranty goes beyond peace of mind, it's a promise that FiTech products are built to perform, mile after mile. Should you ever need support, our in-house technical team is here to assist and ensure you're back on the road quickly.

### What's Covered

- ✓ Defects in materials
- ✓ Workmanship issues under normal use
- ✓ Support from FiTech's in-house technical team

### What's Not Covered

- ✗ Improper installation
- ✗ Misuse or neglect
- ✗ Modification outside FiTech specifications

### OUR PROMISE TO YOU

In 2022, we extended our warranty to three years because FiTech products are built to last. You can trust our systems to deliver reliable performance and enjoy the peace of mind that your investment is protected for years to come.
